

WHAT IS CLAIMED IS:

Sub B1 1. A method of manufacturing an organic EL element, comprising the steps of:

forming pixel electrodes on a transparent substrate;

forming on said pixel electrodes by patterning at least one luminescent layer having a certain color and made of an organic compound; and

forming a counter electrode opposing the pixel electrodes, wherein the formation of the luminescent layer is performed by means of an ink-jet method.

Sub E2 2. The method of manufacturing an organic EL element as claimed in claim 1, wherein the organic compound is a polymer organic compound.

Sub B2 3. The method of manufacturing an organic EL element as claimed in claim 2, wherein the polymer organic compound is a hole injection and transfer type material.

a Sub E4 4. The method of manufacturing an organic EL element as claimed in claim 2 or 3, wherein the polymer organic compound is a polyparaphenylene vinylene or its derivative or a copolymer which contains at least either one of these compounds.

Sub B3 a 5. The method of manufacturing an organic EL element as claimed in <sup>claim 1</sup> ~~any one of claims 1 to 4~~, wherein said at least one luminescent layer comprises three luminescent layers having different three colors, and at least two luminescent layers in the three luminescent layers are formed by patterning by means of an ink-jet method.

b Sub E6 b 6. The method of manufacturing an organic EL element as claimed in claim 5, wherein said <sup>different</sup> ~~three~~ colors include red, green and blue, and the red luminescent layer and the green luminescent layer are formed by patterning by means of <sup>the</sup> ~~an~~ ink-jet method.

7. The method of manufacturing an organic EL element as claimed

in claim 6, wherein the blue luminescent layer is formed by a vacuum deposition method.

8. The method of manufacturing an organic EL element as claimed in claim 7, wherein the blue luminescent layer is made of an electron injection and transfer type material.

9. The method of manufacturing an organic EL element as claimed in ~~any one of claims 1 to 8~~, wherein said at least one luminescent layer is laminated with a hole injection and transfer layer.

10. The method of manufacturing an organic EL element as claimed in ~~any one of claims 1 to 9~~, further comprising the step of forming a protective film on the counter electrode.

11. The method of manufacturing an organic EL element as claimed in ~~any one of claims 1 to 10~~, further comprising the step of forming on said transparent substrate electrodes for driving the respective pixels.

12. The method of manufacturing an organic EL element as claimed in ~~any one of claims 1 to 11~~, wherein said pixel electrodes are transparent pixel electrodes.

13. An organic EL element, comprising:  
a transparent substrate;  
pixel electrodes provided on the transparent substrate;  
at least one luminescent layer having a certain color and made of an organic compound, said luminescent layer being patterned on the pixel electrodes by an ink-jet system; and  
a counter electrode formed on the luminescent layer.

14. The organic EL element, as claimed in claim 13, wherein the organic compound is a polymer organic compound.

15. The organic EL element as claimed in claim 14, wherein the

SubB  
cont. polymer organic compound is a hole injection and transfer type material.

a  
Sub  
F12  
16. The organic EL element as claimed in claim 14 or 15, wherein the polymer organic compound is a polyparaphenylene vinylene or its derivative or a copolymer which contains at least either one of these compounds.

a  
a  
b  
claim 13  
17. The organic EL element as claimed in ~~any one of claims 13 to 16~~, wherein said at least one luminescent layer comprises three luminescent layers having different ~~three~~ colors, and at least two luminescent layers in the three luminescent layers are formed by patterning by means of an ink-jet method.

b  
different  
18. The organic EL element as claimed in claim 17, wherein said ~~three~~ colors include red, green and blue, and the red luminescent layer and the green luminescent layer are patterned by means of an ink-jet method.

a  
claim 13  
19. The organic EL element as claimed in ~~any one of claims 13 to 18~~, wherein the blue luminescent layer is formed by a vacuum deposition method.

SubB  
20. The organic EL element as claimed in claim 19, wherein the blue luminescent layer is made of an electron injection and transfer type material.

a  
claim 13  
21. The organic EL element as claimed in ~~any one of claims 13 to 20~~, wherein said at least one luminescent layer is laminated with an electron injection and transfer type material.

a  
a  
Sub  
F13  
b  
claim 13  
22. The organic EL element as claimed in ~~any one of claims 13 to 21~~, further comprising a protective film formed on the counter electrode.

a  
claim 13  
23. The organic EL element as claimed in ~~any one of claims 13 to 22~~

~~22, wherein said pixel electrodes are transparent pixel electrodes.~~

24. ~~An organic EL display device comprising the organic EL element as claimed in any one of claims 13 to 23.~~

[illegible]
